

## The Quacera ETF Index Portfolio Trend Report

Momentum continues to shift into reverse as we see the Inverse ETFs in or near positive mode and the Long side fading. Since the 2008 crash there have been ten corrections averaging minus 10.7% and lasting an average of 66.3 days. We don't know and won't know if this will develop into a full blown downturn but as we have been warning for several weeks cash is leaving the markets and despite some impressive up days, the overall trend is negative. For our aggressive subscribers, the chance to get long the Inverse ETFs has arrived but for those who just want to be out of the way, we suggest you follow the signals because no matter how deep a sell-off we have or how long it may last (2008 was down 56.8% and took 517 days), our system is very accurate and we are highly confident that it will allow you to see the next trend change early enough to participate in the next up move.

October 11, 2016	Symbol	Today's Price	QPM Score	Trend	Started	Starting Price	% Change Since Start

*This report is for information purposes only. It does not purport to provide individual investment advice. Readers and subscribers are cautioned to seek professional advice from their own advisors. Data in this report is taken from sources deemed to be reliable. Calculations of signal averages are based on the date of each signal and are not annualized. Since the signal prices are as of the close of trading on the dates shown, replicating the signal returns may be difficult as trades based on these signals would differ once the markets reopened. In addition, attempting to reproduce returns as reported would require a strict application of each signal on as timely a basis as possible. From time to time, Quacera, LLC or its employees will be long or short some or all of the securities mentioned in this report.*

*Neither the information nor any opinion expressed herein constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or suggested in this report and investors should understand that statements regarding any future projections may not be realized. Any decision to purchase or sell must be based solely on existing public information on each security and not solely on this report. Prices are subject to change and therefore results will vary from those tracked in the reports.*

*Securities and other financial instruments discussed in this report, or highlighted by Quacera LLC, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution. Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases reliable information about the value or risks related to a security or financial instrument may be difficult to obtain. Investors should note that prices or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.*

Past performance is not a guarantee of future performance.
